

FELIPE MARQUES ESTEVES LAMARCA

✉ felipe.lamarca@hotmail.com  [GitHub](#)  [in LinkedIn](#)  [Website](#)  Rio de Janeiro, Brazil

About me

I am a data scientist with a degree from the [School of Applied Mathematics](#) (FGV EMap) and a social scientist with a degree from the [School of Social Sciences](#) (FGV CPDOC). Currently, I am pursuing a Master's degree in Political Science at the [Institute of Social and Political Studies](#) (IESP-UERJ). My academic background combines rigorous training in mathematics, programming, and social sciences, with a focus on political science and computational social sciences.

I work as a data scientist at [AtlasIntel](#) and do research at the Policy and Election Monitoring and Evaluation Laboratory ([MAPE](#)). My interests include political behavior, public policy, and the application of data science techniques to social science research. This broadly encompasses the use of machine learning, deep learning, causal inference, and survey methods to investigate political phenomena.

Academic Background

› Institute of Social and Political Studies, IESP-UERJ

03/2025 – Present

Master's degree, Political Science
Advisor: [Fernando Meireles, Ph.D.](#)

› School of Applied Mathematics, Getulio Vargas Foundation

02/2021 – 12/2024

Bachelor's degree, Data Science and Artificial Intelligence
Advisor: [Luiz Max Carvalho, Ph.D.](#)

› School of Social Sciences, Getulio Vargas Foundation

02/2019 – 12/2024

Bachelor's degree, Social Sciences
Advisor: [Jaqueline Porto Zulini, Ph.D.](#)

Professional Experience

› [AtlasIntel](#)

06/2025 – Present

Data Scientist working on calibrating survey samples, political analysis, monitoring public opinion, and improving internal data pipelines.

Technologies. Python, R, SQL.

Selected delivery. Reduced the time to retrieve data on Brazilian demographics from hours to a few clicks.

› Independent Consultant in Data Science and Research

07/2024 – 06/2025

Provided end-to-end AI and data solutions (ETL, ML, RAG pipelines, LLMs), research support, and training to clients in various sectors.

Selected Projects:

- **Artplan**: Applied Deep Learning to social media segmentation.
- **Fundação Roberto Marinho**: Designed dashboards (Streamlit Power BI), built AWS data lake, and delivered Python/ML training.
- **Plataforma CIPÓ**: Developed training modules in machine learning and data analysis.
- **GENI/UFF**: Built LLM and RAG-based tools for structured extraction from unstructured documents.

> Instituto Rio21

04/2022 – 06/2025

Data Scientist and Researcher. Led and analyzed opinion polls; produced actionable insights for public policy and urban security initiatives.

Technologies. Python, R, SQL, Streamlit.

Selected deliveries. (i) Reduced the time to produce reports from days to a single hour with an automated Python pipeline; (ii) Built interactive and programmatic maps to corporative audiences.

> Strategic Planning Superintendence, Getulio Vargas Foundation (FGV)

10/2024 – 12/2024

Data Science Intern. Integrated generative AI into decision making pipelines and prepared presentations for FGV's executive leadership.

Technologies. Python, LLMs (OpenAI and Groq APIs), LlamaIndex, LangChain, RAG, Streamlit.

Selected delivery. A RAG pipeline that allowed retrieving information about the publications of the FGV researchers through natural language.

> Visagio

01/2024 – 06/2024

Part-time Data Scientist. Delivered optimization models, SQL pipelines, and Power BI dashboards for pricing and operations teams.

Technologies. Python, SQL, Oracle

Selected deliveries. (i) Calculator to calculate samples for A/B testing; (ii) Power BI dashboards to improve expense auditing; (iii) analytics for better allocation of discount campaigns.

Academic Research Experience

> MAPE (IESP-UERJ)

04/2025 – Present

Researcher. The objective of the Laboratory for Monitoring and Evaluation of Policies and Elections (MAPE) is to improve academic production on political science, public policies and their connections, with a decisive impact on public debate.

Technologies. Python, R, Streamlit, DuckDB.

Selected delivery. A Streamlit application that allows users to interact with the `mape_municipios` database, one of the most complete databases with data about Brazilian municipalities.

› **School of Public and Business Administration, FGV EBAPE**

02/2025 – 04/2025

Research Assistant. Digitized and systematized historical election results using OCR and LLMs under the supervision of Prof. [Cesar Zucco, Ph.D.](#)

Technologies. Python, LLMs (OpenAI, Groq and xAI APIs), Docling, DocTR.

Selected deliveries. Databases with data extracted from historical images, source code, and technical report.

› **CEBRAP**

10/2024 – 02/2025

Consultant for the Center for Critical Imagination. Applied OCR and LLMs to social science research, in collaboration with [José Szwako, Ph.D.](#)

Technologies. Python, LLMs (OpenAI and Grok APIs), Docling.

Selected deliveries. Databases with data extracted from PDFs, source code, and technical report.

› **School of Social Sciences, FGV CPDOC**

06/2019 – 09/2022

Junior Research Fellow. Supported by an FGV/CNPq scholarship, I examined Executive-Legislative relations in the early 20th century using qualitative and quantitative methods. Supervised by Prof. [Jaqueline Porto Zulini, Ph.D.](#)

Technologies. R, Python.

Selected deliveries. (i) 3 technical reports; (ii) a peer-reviewed article.

Teaching & Instruction

Teaching

› **Automated Text Analysis – SICSS Brazil**

2025.1

Crash course on modern approaches to text-as-data in social science as part of the Summer Institute in Computational Social Science (SICSS), Brazil.
[\[Presentation\]](#)

Teaching Assistance

› **Advanced Text-as-Data – IESP-UERJ Winter School (Graduate)**

2025.1

Covered deep learning, embeddings, transformers, and LLMs applied to political science.
Instructors: [Tiago Ventura, Ph.D.](#) and [Sebastián Vallejo Vera, Ph.D.](#)
[\[Course website\]](#)

› **Quantitative Methods II – FGV CPDOC (Undergraduate)**

2024.2

Exploratory data analysis, statistical inference, and regression models.
Instructor: [Jairo Nicolau, Ph.D.](#)

› **Introduction to R – FGV CPDOC (Graduate)**

2020.2

Introduction to programming for social science applications.
Instructor: [Jimmy Medeiros, Ph.D.](#)

Publications

Published/Accepted – peer reviewed

-  The Executive-Legislative relations in the Brazilian First Republic: an analysis of the presidential messages sent to Congress (1910–1920). *Mosaico*. 2021.
[\[link\]](#)
-

Under Review

-  Explanatory factors behind the decision to support or reject the creation of a municipal basic income policy: analysis of the perception of Rio residents. 2025.
Joint work with Jimmy Medeiros, Antônio Mariano, and Philippe Chaves Guedon (FGV CPDOC).
-

Digital Tools & Open-Source Projects

-  `mape_municipios_dashboard` (2025)
A dashboard to explore one of the most comprehensive databases on Brazilian municipalities, built for [MAPE](#).
Joint work with Fernando Meireles (IESP-UERJ).
[\[Source code\]](#) · [\[Access link\]](#)
-  `RelicárIA` (2025)
A platform that combines AI and data analysis to extract and visualize information from historical documents.
Joint work with Danielle Sanches de Almeida (FGV ECMI).
[\[Source code\]](#) · [\[Access link\]](#)
-  `BoticárIA` (2025)
A RAG-based conversational AI that simulates an 18th-century apothecary, grounded in historical pharmacological sources.
Joint work with Danielle Sanches de Almeida (FGV ECMI).
[\[Source code\]](#) · [\[Access link\]](#)
-  `Scielo-Summariser` (2024)
A tool for extracting and summarizing scientific articles from the [Scielo](#) database using NLP and LLM techniques.
[\[Source code\]](#) · [\[Access link\]](#)

Repositories for studies and fun

[\[link\]](#) Machine Learning

Probabilistic machine learning, mixture models, and approximate Bayesian inference.

[\[link\]](#) Deep Learning

Foundations of NN, CNNs, LSTMs, GANs, Transformers, transfer learning, and autoencoders.

[\[link\]](#) Comida di Buteco 2025

A Streamlit App that allows you to see all the bars that are competing in the "Comida di Buteco" contest in Brazil.

[\[link\]](#) **Lego I**

Quantitative social science: data analysis, research design, probability, inference.

[\[link\]](#) **Survey Research**

Total survey error paradigm, sampling, questionnaire design, post-stratification.

Participation in Events

July 2024 [Summer Institute in Computational Social Sciences](#) – Collaborated with international researchers on computational social science projects during a two-week program. Although the program is aimed at graduate students, I had the opportunity to participate as an undergraduate.

July 2024 [ML4Good](#) – Attended a ten-day bootcamp on AI Safety, focusing on AI Alignment and Governance. The program deepened understanding of the ethical and regulatory aspects of AI, reinforcing a commitment to responsible AI development and governance.

Awards and Grants

2025 Master's Scholarship, Coordenação de Aperfeiçoamento de Pessoal de Nível Superior (CAPES).

2025 Professor Carlos Eduardo Sarmiento Academic Distinction Award from the School of Social Sciences (FGV CPDOC) for achieving the highest academic performance among the 2025 graduates of the CPDOC undergraduate program.

2021 Institutional Scientific Initiation Scholarship Program (2021-2022), CNPq.

2020 Institutional Scientific Initiation Scholarship Program (2020-2021), FGV.

2020 Best Paper award at the History and Social Sciences Students' Week (FGV CPDOC).

2019 Institutional Scientific Initiation Scholarship Program (2019-2020), FGV.

2019 90% Merit Scholarship to pursue undergraduate studies in Social Sciences (and subsequently in Data Science and AI) at Fundação Getulio Vargas (FGV), awarded for outstanding performance in the entrance examination.
