About me

I am a data scientist with a degree from the [School of Applied Mathematics](#) (FGV EMap) and a social scientist with a degree from the [School of Social Sciences](#) (FGV CPDOC). Currently, I am pursuing a Master's degree in Political Science at the [Institute of Social and Political Studies](#) (IESP-UERJ), where I am writing a dissertation on preference estimation in the Brazilian Congress. My academic background combines rigorous training in mathematics, programming, and social sciences, with a focus on political science and computational social sciences.

I work as a data scientist at [AtlasIntel](#) and do research at three laboratories based at IESP-UERJ: [MAPE](#), on the monitoring and evaluation of policies and elections; [DOXA](#), on electoral studies, political communication, and public opinion; and [NECON](#), on the Brazilian Congress. My interests include political behavior, public policy, and the application of data science techniques to social science research. This broadly encompasses the use of machine learning, deep learning, causal inference, and survey methods to investigate political phenomena.

Academic Background

Institute of Social and Political Studies, IESP-UERJ

03/2025 – Present

Master's degree, Political Science

Advisor: [Fernando Meireles, Ph.D.](#)

School of Applied Mathematics, Getulio Vargas Foundation

02/2021 – 12/2024

Bachelor's degree, Data Science and Artificial Intelligence

Advisor: [Luiz Max Carvalho, Ph.D.](#)

School of Social Sciences, Getulio Vargas Foundation

02/2019 – 12/2024

Bachelor's degree, Social Sciences

Advisor: [Jaqueline Porto Zulini, Ph.D.](#)

Academic Research Experience

[MAPE](#) (IESP-UERJ)

04/2025 – Present

Researcher. The objective of the Laboratory for Monitoring and Evaluation of Policies and Elections (MAPE) is to improve academic production on political science, public policies and their connections, with a decisive impact on public debate.

Technologies. Python, R, Streamlit, DuckDB.

Selected delivery. A Streamlit application that allows users to interact with the `mape_municipios` database, one of the most complete databases with data about Brazilian municipalities.

[DOXA](#) (IESP-UERJ)

05/2025 – Present

Researcher. The Laboratory of Electoral Studies, Political Communication and Public Opinion (DOXA), coordinated by Fernando Meireles and Argelina Cheibub Figueiredo, runs surveys on the political attitudes of Brazilian voters.

Technologies. R, Python, survey weighting and post-stratification.

Selected delivery. Analysis of the DOXA survey on how the population of the state of Rio de Janeiro learns about politics, now a working paper.

NECON (IESP-UERJ)

2026 – Present

Researcher. The Center for Studies on Congress (NECON), coordinated by Fabiano Santos, maintains databases on roll-call votes, party switching, and legislative production.

Selected delivery. A technical note that applies spatial models of voting to the 2026 presidential race.

Pensando o Direito research grant (MJSP)

07/2026 – Present

Researcher. Grant awarded by the *Pensando o Direito* programme of the Ministry of Justice and Public Security (MJSP). Systematic review of the evidence on a set of public security policies for the Legal Amazon, organized around the idea of a qualified entry of the State into vulnerable territories. The review follows the OQF (*O Que Funciona?*) protocol developed at MAPE. Project coordinated by Djane Braz Duarte.

Expected deliveries. (i) an analytical report for the Ministry; (ii) an article submitted to a peer-reviewed journal; (iii) entries on the reviewed policies in the [Dicionário de Favelas Marielle Franco](#).

RESA project (UFAC and IESP-UERJ)

08/2025 – Present

Researcher. Socioeconomic and environmental impacts of family-based agroextractive production systems in the Chico Mendes Extractive Reserve, in the state of Acre, with an emphasis on what cooperatives change in land use and in household income. Project coordinated by Luci Maria Teston (UFAC), with IESP-UERJ as a partner institution.

My role. Quantitative data collection and analysis, and development of the project's public monitoring platform.

Technologies. R, Python, Streamlit; INPE deforestation data and IBGE censuses.

Selected delivery. A preliminary version of the [monitoring platform](#), covering deforestation in Acre.

School of Public and Business Administration, FGV EBAPE

02/2025 – 04/2025

Research Assistant. Digitized and systematized historical election results using OCR and LLMs under the supervision of Prof. [Cesar Zucco, Ph.D.](#)

Technologies. Python, LLMs (OpenAI, Groq and xAI APIs), Docling, DocTR.

Selected deliveries. Databases with data extracted from historical images, source code, and technical report.

CEBRAP

10/2024 – 02/2025

Consultant for the Center for Critical Imagination. Applied OCR and LLMs to social science research, in collaboration with [José Szwako, Ph.D.](#)

Technologies. Python, LLMs (OpenAI and Grok APIs), Docling.

Selected deliveries. Databases with data extracted from PDFs, source code, and technical report.

School of Social Sciences, FGV CPDOC

06/2019 – 09/2022

Junior Research Fellow. Supported by an FGV/CNPq scholarship, I examined Executive-Legislative relations in the early 20th century using qualitative and quantitative methods. Supervised by Prof. [Jaqueline Porto Zulini, Ph.D.](#)

Technologies. R, Python.

Selected deliveries. (i) 3 technical reports; (ii) a peer-reviewed article.

Professional Experience

AtlasIntel

06/2025 – Present

Data Scientist working on calibrating survey samples, political analysis, monitoring public opinion, and improving internal data pipelines.

Technologies. Python, R, SQL.

Selected delivery. Reduced the time to retrieve data on Brazilian demographics from hours to a few clicks.

Independent Consultant in Data Science and Research

07/2024 – 06/2025

Provided end-to-end AI and data solutions (ETL, ML, RAG pipelines, LLMs), research support, and training to clients in various sectors.

Selected Projects:

- [Artplan](#): Applied Deep Learning to social media segmentation.
- [Fundação Roberto Marinho](#): Designed dashboards (Streamlit and Power BI), built AWS data lake, and delivered Python/ML training.
- [Plataforma CIPÓ](#): Developed training modules in machine learning and data analysis.
- [GENI/UFF](#): Built LLM and RAG-based tools for structured extraction from unstructured documents.

Instituto Rio21

04/2022 – 06/2025

Data Scientist and Researcher. Led and analyzed opinion polls; produced actionable insights for public policy and urban security initiatives.

Technologies. Python, R, SQL, Streamlit.

Selected deliveries. (i) Reduced the time to produce reports from days to a single hour with an automated Python pipeline; (ii) Built interactive and programmatic maps to corporate audiences.

Strategic Planning Superintendence, FGV

10/2024 – 12/2024

Data Science Intern. Integrated generative AI into decision making pipelines and prepared presentations for FGV's executive leadership.

Technologies. Python, LLMs (OpenAI and Groq APIs), LlamaIndex, LangChain, RAG, Streamlit.

Selected delivery. A RAG pipeline that allowed retrieving information about the publications of the FGV researchers through natural language.

Visagio

01/2024 – 06/2024

Part-time Data Scientist. Delivered optimization models, SQL pipelines, and Power BI dashboards for pricing and operations teams.

Technologies. Python, SQL, Oracle.

Selected deliveries. (i) Calculator to calculate samples for A/B testing in complex non-experimental settings; (ii) Power BI dashboards to improve expense auditing; (iii) analytics for better allocation of discount campaigns.

Publications

Peer-reviewed articles

- The Executive-Legislative relations in the Brazilian First Republic: an analysis of the presidential messages sent to Congress (1910–1920). *Mosaico*, v. 13, n. 20, p. 525–546. 2021.
[\[DOI\]](#) · [\[Access link\]](#)

Master's dissertation

- Preference estimation in the Brazilian Congress. IESP-UERJ, in progress.
Advisor: Fernando Meireles, Ph.D.

Working papers

- Como a população do estado do Rio de Janeiro se informa sobre política? DOXA (IESP-UERJ). 2026.
Joint work with Fernando Meireles and Argelina Cheibub Figueiredo (IESP-UERJ).
- Quantos votos meu partido vai fazer? Um tutorial de validação preditiva com dados abertos (2016–2024). 2026.
Joint work with Tomás Paixão Borges (IESP-UERJ).
- Da gaveta ao plenário: os caminhos da aprovação de pautas na Câmara dos Deputados. 2026.
Joint work with Lucas Calabro Berti (IESP-UERJ).

Technical notes

- Nota Técnica NECON sobre as próximas eleições presidenciais. NECON (IESP-UERJ). 2026.
Joint work with Fabiano Santos and Carlos Freitas (IESP-UERJ).

Presentations

- Sept–Oct 2026** [50th ANPOCS Annual Meeting](#), SPG 31 – Methodology and Research Methods in the Social Sciences. *Quantos votos meu partido vai fazer? Um tutorial de validação preditiva com dados abertos (2016–2024).*
- August 2026** XV Meeting of the Brazilian Political Science Association (ABCP), Belém, Brazil. *Da gaveta ao plenário: os caminhos da aprovação de pautas na Câmara dos Deputados.*
- November 2025** 10th Student Week of the Postgraduate Programs of IESP-UERJ. *Quantos votos meu partido vai fazer? Prevendo o vote share nos municípios fluminenses.* [\[Files\]](#)
- August 2025** [24th Congress of the Global Basic Income Network \(BIEN\)](#). *Fatores explicativos do apoio ou rejeição à criação de uma política municipal de renda básica: modelando a percepção dos cariocas.* [\[PDF\]](#)

Digital Tools and Open-Source Projects

- **mape_municipios_dashboard** (2025)
A dashboard to explore one of the most comprehensive databases on Brazilian municipalities, built for [MAPE](#).
Joint work with Fernando Meireles (IESP-UERJ).
[\[Source code\]](#) · [\[Access link\]](#)
- **LGBTQIA+ indicators in Rio de Janeiro** (2026)
A dashboard built on the [mape_municipios](#) infrastructure for the office of state deputy Dani Balbi, bringing together MUNIC, PNS, and Censo SUAS data on the LGBTQIA+ population of the state of Rio de Janeiro, including the territorial distribution of social assistance facilities.
Joint work with Tomás Paixão Borges (IESP-UERJ).
- **RelicárIA** (2025)
A platform that combines AI and data analysis to extract and visualize information from historical documents. 2nd Runner Up for Best DH Tool or Suite of Tools at the DH Awards 2025.
Joint work with Danielle Sanches de Almeida (FGV ECMI).
[\[Source code\]](#) · [\[Access link\]](#) · [\[DOI\]](#)
- **BoticárIA** (2025)
A RAG-based conversational AI that simulates an 18th-century apothecary, grounded in historical pharmacological sources.
Joint work with Danielle Sanches de Almeida (FGV ECMI).
[\[Source code\]](#) · [\[Access link\]](#)
- **Quarto-Model-IESP** (2026)
A Quarto template for IESP-UERJ dissertations and theses.
Joint work with Matheus Cavalcanti Pestana (IESP-UERJ).
[\[Source code\]](#) · [\[DOI\]](#)

– **SciELO-Summarizer** (2024)

A tool for extracting and summarizing scientific articles from the [SciELO](#) database using NLP and LLM techniques.

[\[Source code\]](#)

Teaching & Instruction

Teaching

Introduction to AI agents in academic research

06/2026

Short course at [LABIIA](#) on the use of AI agents in academic research.

[\[Files\]](#)

AI agents for social science research

05/2026

Short course at [CERES](#), IESP-UERJ: an introduction to Claude Code.

[\[Files\]](#)

Sociology for Nursing

2025.2

Teaching internship (*estágio docência*) at UERJ, in an undergraduate course.

Machine Learning

2025.2

Methodological training of [MAPE](#). Fundamentals of machine learning, focusing on recognizing, training, interpreting, and evaluating simple predictive models applied to social research.

[\[Files\]](#)

Deep Learning & Text-as-Data

2025.2

10th Student Week of the Postgraduate Programs of IESP-UERJ. Fundamentals of deep learning: what it is and how to train a neural network, and text-as-data with deep learning.

[\[Files\]](#)

Automated Text Analysis

2025.1

Crash course on modern approaches to text-as-data in social science, part of the [Summer Institute in Computational Social Science \(SICSS\) Brazil](#).

[\[PDF\]](#)

Teaching Assistance

Advanced Text-as-Data

2025.1

IESP-UERJ Winter School (graduate). Covered deep learning, embeddings, transformers, and LLMs applied to political science. Instructors: [Tiago Ventura, Ph.D.](#) and [Sebastián Vallejo Vera, Ph.D.](#)

[\[Course website\]](#)

Quantitative Methods II

2024.2

FGV CPDOC (undergraduate). Exploratory data analysis, statistical inference, and regression models. Instructor: [Jairo Nicolau, Ph.D.](#)

Introduction to R

2020.2

FGV CPDOC (graduate). Introduction to programming for social science applications. Instructor: [Jimmy Medeiros, Ph.D.](#)

Repositories for studies

Open notes and exercises from the methods courses I have taken.

– [Lego I](#) – *Quantitative social science: data analysis, research design, probability, inference.*

- [Lego II](#) – *Linear regression models and extensions.*
- [Lego III](#) – *Causal inference: potential outcomes, DAGs, and identification strategies.*
- [Survey Research](#) – *Total survey error paradigm, sampling, questionnaire design, post-stratification.*
- [Systematic Review](#) – *Systematic review and evaluation of public policies.*
- [Introduction to Legislative Studies](#) – *Legislative behavior according to rational choice theory.*
- [Machine Learning](#) – *Probabilistic machine learning, mixture models, and approximate Bayesian inference.*
- [Deep Learning](#) – *Foundations of NN, CNNs, LSTMs, GANs, Transformers, transfer learning, and autoencoders.*

Participation in Events

February 2026 [Effective Altruism Global](#) – San Francisco, CA, United States (full funding).

November 2025 10th Student Week of the Postgraduate Programs of IESP-UERJ.

November 2025 Academic writing and publication of quantitative papers in the social sciences – IESP-UERJ.

August 2025 24th Congress of the Global Basic Income Network (BIEN).

July 2025 IESP-UERJ Winter School.

July 2024 [Summer Institute in Computational Social Sciences](#) – Rio de Janeiro, RJ, Brazil.

July 2024 [ML4Good](#) bootcamp.

Scholarships and Distinctions

Scholarships

2026–2027 Graduate Scholarship, Fundação Carlos Chagas Filho de Amparo à Pesquisa do Estado do Rio de Janeiro (FAPERJ Nota 10).

2025–2026 Master's Scholarship, Coordenação de Aperfeiçoamento de Pessoal de Nível Superior (CAPES).

2021–2022 Institutional Scientific Initiation Scholarship (CNPq).

2019–2021 Institutional Scientific Initiation Scholarship (FGV).

2019–2024 90% Merit Scholarship for undergraduate studies in Social Sciences (later including Data Science and AI) at the Getulio Vargas Foundation, awarded for outstanding performance in the entrance examination.

Distinctions

2026 2nd Runner Up, Best DH Tool or Suite of Tools, [DH Awards 2025](#), for RelicárIA.

2026 Selected for the FAPERJ Nota 10 scholarship, awarded for performance in the first year of the Master's program at IESP-UERJ.

2025 Professor Carlos Eduardo Sarmiento Academic Distinction Award, School of Social Sciences (FGV CPDOC), for achieving the highest academic performance among the Class of 2025 undergraduate students.

2024 1st place admission to the Master's program in Political Science at IESP-UERJ.

2020 Best Paper Award, History and Social Sciences Students' Week (FGV CPDOC).
